

VPN Config – MacOS

1. To install CIIMAR VPN on MacOS, you only need our Profile Config. Just send an e-mail from your CIIMAR account to vpn_config@ciimar.up.pt , and click on the link to get you file, it's after the secret shared key (just ignore the secret key, this key it's only for Windows Users).
2. Next, follow this instructions when you open the file:

Click Continue

Click Continue

Indique as definições de "CIIMAR VPN":

VPN

Digite as definições do perfil VPN de sistema "VPN":

Nome de utilizador:

Palavra-passe:

Cancelar Anterior Instalar

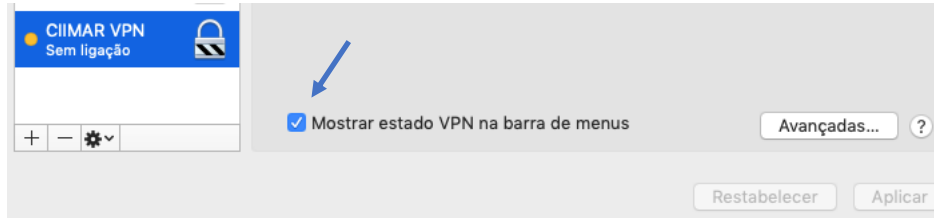

In this step, please use your CIIMAR email address and password

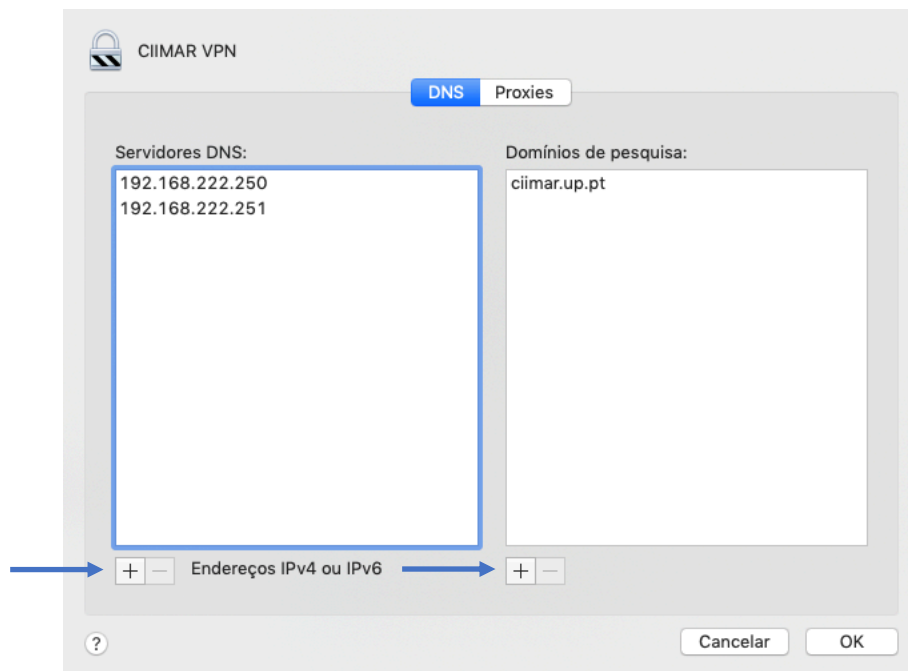

Select Install

Next it will ask for your confirmation with your MacOs login password. And that's it.... Only a couple a steps to get your VPN working and to be able to access HRP Platform from outside networks.

3. Open System Preferences, select Network Preferences and on the left side, click on CIIMAR VPN, check the "Show VPN Status..." and click Apply

4. Next click Advanced and fill the info:

Click OK and then Apply. That's it.

5. At the top bar on the right side you'll have a new icon with the connection available to you.

Thanks,
