

How to install the CIIMAR PRINTER on MacOS

To install the printer open Systems Preferences and then go to Printers & Scanners.

Click "+" and then choose the

	Printers & Scanners	Q Search
	No printers are av Click Add (+) to set u	ailable. 5 a printer.
+ -		
+ -	Default printer: Last Printer Use	d 😧

٢
bbA

Now choose the 3rd option (printer icon), followed by "ciimar" and look up for "golfinho".

You will see that the following window will pop-up. Click "Continue" and enter your CIIMAR credentials.

- Anagogra-	Enter your username and password for the print server "golfinho".
	Connect As: O Guest
You are attempting to connect to	Registered User
the server "golfinho".	Name:
Click Connect to continue.	Password:
Cancel Connect	Remember this password in my keychain
	Cancel

In this window, we need to choose the option "CIIMAR_PRINTERS", add the location ("CIIMAR") and select the "Generic PostScript Printer" option.
